Career Objective

An Information Science and Engineering graduate with strong fundamentals in information technology, software development, database management, and problem-solving, proficient in programming and analytical thinking, seeking a growth-oriented and challenging role to apply and enhance technical skills while contributing to organizational success.

Skills

Programming: Java, Python, JavaScript
Frontend: React, HTML, CSS
Backend: Java (Spring Boot), Node.js (Express)
Database: MySQL
Core Concepts: OOPs, DSA, Operating Systems
Testing: JUnit, Selenium
Version Control: Git, GitHub

Projects

- **Fashion Store E-Commerce Web Application**
React, HTML, CSS, Java, JDBC, Servlets, MySQL, Apache Tomcat
 - Developed a full-stack fashion e-commerce web application using the MVC architecture.
 - Implemented user authentication, product browsing, shopping cart, and order management using **Java Servlets**, **JDBC**, and **MySQL**.
 - Designed responsive and user-friendly interfaces with **React**, **HTML**, and **CSS**, and integrated frontend with backend modules for seamless functionality.
- **Student Database Management System**
MySQL
 - Designed and managed a database system for storing and retrieving student records.
 - Performed database operations such as insert, update, delete, and search using SQL queries.
 - Improved data organization and management efficiency using relational database concepts.
- **Sign Language Detection**
Python, OpenCV, MediaPipe, TensorFlow, NumPy
 - Built a computer vision model to detect and recognize sign language gestures in real-time.
 - Used **MediaPipe** for hand landmark extraction and **TensorFlow** for gesture classification.
 - Enhanced communication accessibility through machine learning and image processing techniques.

Experience

- **TAP Academy** Feb 2026 – July 2026
AI Software Developer Intern
 - Gained practical experience in software development and full-stack web technologies.
 - Learned **Core Java**, **Advanced Java**, **MySQL**, **HTML**, **CSS**, and **JavaScript**.
 - Worked on a **Fashion Store E-Commerce Web Application** using MVC architecture.
 - Integrated frontend, backend, and database modules for complete application development.

Achievements

- Certified as a Test Engineer - Infosys Foundation

Education

- **Jain Institute of Technology** Davanagere, India
B.E. in Information Science and Engineering — CGPA: 8.56 2022 – 2026
- **Bhadra PU College** Davanagere, India
Pre-University - PCMB — Percentage: 84.66% 2019 – 2021

Certifications

- Java Programming (Great Learning)
- Operating System (Great Learning)
- Cloud Computing (Infosys Springboard)
- Artificial Intelligence (Infosys Springboard)
- Test Engineer - Infosys Foundation
